When was the last time you upgraded your hardware? You probably don't... because they cost you way more money than you would have spent upgrading software. With 2PCS software, you will be getting lifetime upgrades for as long as you own the original edition. The technology behind this software is called 2PCS, which is very smart. This technology scans your computer and keeps track of the updates you already have installed, when they were installed, and what software is installed. Now, based on that information, it compares the previous version of the software against the new version and matches it to the closest version. With this system in place, it can easily detect if you are missing a minor or major update without you even knowing it. Even though we've been doing this for a long time, we are always excited to implement new updates. That's why we are willing to offer you this software for as long as you need it, even if it's still under the ownership of the original edition. Because of this technology, it can detect missing updates that were never installed before and it can install the missing update with one click. You don't even have to download the update anymore. Simply click “Next” and choose the update you want to install and click “Finish” and your software will get upgraded to the latest version, with no hassle. That is the reason we call this software “2PCS Upgrade”. With this software, you don't have to worry about the updates anymore. HDD Raw Copy Tool Portable Free

HDD Raw Copy Portable is a tool that was designed to duplicate the contents of any hard disk drive. The program has a simple interface that should be easy to figure out, thanks to the intuitive layout. As mentioned, the app can create an exact duplicate of a hard drive, regardless of the interface. It supports SATA, IDE, SAS, SCSI or SSD HDDs. It also works with any USB and FIREWIRE external drive, as well as SD, MMC, Memory Sticks and CompactFlash media. Basically, the program creates a sector-by-sector copy of all areas of the drive, including the MBR (Master Boot Record), boot records, partitions and the space in between. The app works regardless of the operating systems on the drive, whether Windows, Linux, Mac or any other OS. It also works well regardless of the number of partitions, including the hidden ones. If there are any bad sectors on the disk, the program skips them so the result is a flawless copy of the drive. Among the HDD/SSD manufacturers that the app supports, you can find Intel, Samsung, Maxtor, Seagate, Western Digital, IBM, Fujitsu, Toshiba, Quantum, Hitachi, Kingston and almost any other known brand. Since the program is completely portable, it doesn't need to be installed to the computer in order to work and can be launched from removable devices, such as flash drives. So far, the interface of the program has been tested for Windows 10, 8.1, 7, Vista and XP. Please note that this is a fully functional software and contains no 'potential' ads. 1.0.2 24.09.2015 Bug Fix 1.0.1 21.09.2015 Bug Fix 1.0.0 01.09.2015 Preview Ratings Details HDD Raw Copy Portable is a tool that was designed to duplicate the contents of any hard disk drive.
