April 4, 2021 - . . (From the comments to the post "Birthday in the hospital. Part 2.") I also had my birthday in the hospital last year. After an operation to remove the gallbladder (biliary adenectomy), I was hospitalized for 10 days. They took out bile from me with all the contents, and they did an ultrasound in the same place, in the hospital. Then I was discharged for observation, and after 10 days they again put me in surgery to remove the stone from the gallbladder ducts, again for 10 days. And then they were already discharged home for self-healing.
