August 7, 2012 - ERD Commander is very useful for diagnosing and fixing crashes on non-bootable computers and usually comes as an ISO file. After downloading the file from this media, you need to run it and wait about 1-2 minutes until a window appears with the choice of the language to be installed. If you are working with Windows XP, then on the "General" tab you will need to select "Russian" or "Russian" if this language is used in your region. In other menus, you can select any tab, usually "Windows XP", "Windows Vista", "Windows 7" or "Windows 8". To launch ERD Commander, press the "F12" key on your keyboard.
