# FREQUENTLY ASKED QUESTION: Saving and printing digital documents Digital documents have become the preferred medium for publishing a variety of information. Using one or more digital devices (for example, a personal computer, tablet PC, smartphone, or even a fax machine), you can create, save, send, and print digital files. The term _digital document_ is an umbrella term that includes various types of digital content. The term can refer to everything from a simple JPEG file to a brochure produced on a desktop publishing (DTP) program. A digital document often has content that can be viewed in a variety of ways, including on a computer screen, a smartphone, and in print. A digital document can be nothing more than a series of numbers and letters, but it can also include dynamic and interactive content. As the technology and software that enables your digital content to be created, saved, and shared develops, so does its capability to be printed. Document sizes have expanded to the point where you can create and print a variety of documents that are virtually impossible using traditional printing and copying techniques. For instance, you can create a sign that is as small as a postcard or
