the Web, and managing them is an important skill. This site is your digital photography hub. License: Demo of IceCream Image Resizer Crack For Windows that runs only in Demo mode (no registration required)

Q: How do I make All numbers greater than X? I am new to Android and I am trying to make a program where I have an EditText field and then in the logcat I see the values of the EditText field. The values of the EditText field are stored in a TextView. I am trying to make a program where I can put a value in the EditText field and then in the logcat output I can see how many numbers are greater than the value of the EditText field. How can I make a program like this? I know how to get the values of the EditText field into the logcat but not how to do it with a number. Thanks!

A: Here is a simple sample program that does what you are asking.

```
public class MainActivity extends Activity {
    @Override protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        EditText et = (EditText) findViewById(R.id.edtTest);
        int iNum = Integer.parseInt(et.getText().toString());
        Log.i("tag", "Number " + iNum + " is greater than 100");
        TextView tv = (TextView) findViewById(R.id.tvResult);
        tv.setText(String.valueOf(iNum > 100 ? "Yes" : "No"));
    }
}
```

you can run it from eclipse's Run As > Android Application. . As you can see above, you can read an EditText, get its text to String, and convert it to Integer then you can use an if statement to compare your value against a number, and return a string.
